

DENTAL SUCCESS TODAY

PRACTICE — IN ACTION —

"Our dental success for the month on June includes several parts. It's very important that every staff member be on the same page when it comes to our patients care and the health of their smile. If we have staff members that don't see the benefit of what we are doing then we will not accomplish the success we are constantly striving for. We at Dr. Allyson Mulders office have had some hesitation within the office as we started our new journey with Scott and the Dental Success Today Team. However, in recent weeks it's obvious everyone on the team is participating and is excited about our personal dental success. Not only that, but our case acceptance has only been on the rise! For the month of June we not only met our monthly goal of 70K, but we blew past it by \$32,000.00! The excitement of having patient acceptance, watching our production as well as collections grow brought so much excitement to all of us, it was shining out of everyone's faces daily! We leave each night exhausted of course from giving 110%, but also are so pumped because tomorrow we know we can only do better on our daily case acceptance from patients wanting to value their health and smile.

GO MULDER TEAM!"
